

# Luma Connections #15: Using Learning Communities to Evaluate Places

## Teaching Tool: Discussion Board

This is an online tool that allows learners to interact with each other to explore a topic and to discuss key concepts and concepts, share experiences, interact with each other, and to ask questions. Interactions are not in real-time and can be mentor-learner and learner-to-learner.

**Tip: Use Learning Communities to evaluate places.**

Communities on the go...you know what this looks like. What if we could evaluate different places to help make decisions about where to get gas? Where to pull over and get rest when driving? The best places to eat?

A community of learners can help with this. Set up a discussion board for learners to post evaluations on specific topics.

Want to share your favorite places and things? Looking for recommendations along your route? This is the place!
