

## Mobile App Developer (iOS & Android)

Part-Time / Contract (Remote, US)

### Job description

Luma believes that when people learn, their lives improve and so does society. Everything we do is created with this mission in mind.

At Luma, we have the following core values.

- CUSTOMER COMMITMENT: We build relationships that make a positive difference in our client's and our lives.
- INTEGRITY: We deliver on our promises.
- QUALITY: What we do, we do well.
- PASSION: Committed in heart and mind.
- TEAMWORK: We can all do small things, but together we can do something wonderful.

The Luma team strives to deliver excellence in customer experience in the trucking industry. We are a three-time Inc. 5000 company committed to a great work culture for our team and our clients.

We are looking for an experienced Mobile App Developer to help maintain, improve, and support a portfolio of existing mobile applications. Our ecosystem includes Apple App Store apps, Google Play Store apps, and multiple SSO-based partner applications.

This role is ideal for a senior, self-directed developer who enjoys working across established codebases, improving stability, shipping incremental enhancements, and collaborating with a small product and engineering team.

This is a remote, part-time or contract role for candidates based in the United States.

### Responsibilities

- Maintain and enhance existing iOS and Android applications
- Diagnose and fix bugs, performance issues, and store-related issues
- Implement updates for OS changes, SDK updates, and third-party dependencies
- Support and improve SSO-based applications and partner integrations

- Assist with App Store and Play Store submissions, updates, and compliance requirements
- Collaborate with product, backend, and support teams to resolve issues efficiently
- Improve code quality, maintainability, and documentation over time
- Provide input on technical decisions related to mobile architecture and tooling

## Qualifications

### Technical Skills

- 5+ years of professional mobile development experience
- Strong experience with:
  - iOS (Swift, Xcode, App Store processes)
  - Android (Kotlin or Java, Android Studio, Play Store processes)
- Experience working with existing production apps (not just greenfield builds)
- Familiarity with authentication and SSO flows (OAuth, SAML, OpenID Connect, etc.)
- Experience integrating REST APIs and third-party SDKs
- Comfortable debugging production issues and working through ambiguous problems
- Strong written and verbal communication skills
- Ability to work independently and manage time effectively in a remote environment

### Preferred Qualifications

- Experience with cross-platform frameworks (React Native, Flutter, etc.)
- Familiarity with CI/CD for mobile apps
- Experience supporting partner or white-labeled applications
- Understanding of mobile security best practices
- Prior experience working as a contractor or fractional team member

## Job Type

This is a part-time / contract position in the United States.

## Collaboration

- This role will report to the Engineering Manager.
- This role is part of our IT Department.
- The Luma team is small (<25) so interaction and engagement with everyone is possible.
